

Trillium Partners provides executive management and advisory services to help emerging companies navigate their rapidly changing business landscape. Trillium Partners are accomplished leaders, highly experienced in uniting sound business fundamentals with innovative thinking towards markets, products and services, partners and business operations.

We invest the time to develop intimate relationships with our clients to translate strategic vision into achievable tactics. Utilizing our experience as business operators, we address diverse issues while utilizing a practical, hands-on approach. We work closely with our clients to ensure that they are well-structured, appropriately staffed, properly positioned in their markets and thoroughly prepared for the demands of growth. Our strength lies in the belief that new opportunities and business transformation are developed through knowledge gathering and delivery of informed decisions. Companies depend on Trillium Partners when they have a temporary management vacancy or when faced with either first time or non-recurring events requiring leadership and knowledge that is adaptable to a wide variety of circumstances.

Services

For early growth companies, our advisory services consist of all management functions beyond the entrepreneurial vision or creation of proprietary technology and products. We deliver business expertise to lead and manage the company, or management functions, so that the organization is structured, positioned and staffed to execute business strategies quickly and effectively. For more developed companies, our services are focused in one or two functional areas, such as strategic planning, business development, or operations. Trillium Partners are part of the daily interactions of the management team and the efforts of the entire client organization to help them understand the challenges, identify solutions and define clear paths to expected results. Our goal is to guide the client's management team and leave them more knowledgeable and better prepared to manage the next event on their own. The true quality of a leader is the ability to teach others and inspire them to new levels of performance.

Leadership

Craig D. Mack is the President of Trillium Partners. He is a seasoned business executive with proven abilities in strategic planning and leadership, team building, solution sales and service management, business development, delivery channels, operations management, mergers and acquisitions, information systems and management consulting. His experiences reflect 30+ years of progressive assignments across a diverse set of industries. Craig has held senior leadership positions within Fortune 200 Corporations, Emerging Growth Companies and Start-Up Ventures including President, Chief Operating Officer, Vice President, Director and General Manager. He is an excellent communicator, facilitator, and sponsor for delivering guidance to multiple stakeholders including shareholders, board of directors, executive management, employees, customers and vendors. Craig has the vision, business knowledge, integrity, drive and calming ability to lead organizations through periods of rapid change in their business landscape. He is valued for his strategic insights, practical solutions and ability to communicate complex issues in understandable terms.
